

Environmental Governance Programme

SWEDISH
ENVIRONMENTAL
PROTECTION
AGENCY

What it's all about

Support resource-rich countries in integrating **environmental** and **human rights** protection into mining governance.

Support locally-led processes, bringing all stakeholders together and championing stronger laws, regulations & community-based monitoring

The context

Growing demand for critical mineral resources for the low-carbon transition

Unresolved environmental governance challenges that lead to the consecution of the SDG, climate goals, and just transition.

Swedish unique comparative advantages: history, commitment to human rights, high environmental values
